EDUCATION

Clemson University

May. 2027

Bachelor of Science in Computer Science, Minor in Cybersecurity | GPA: 3.5/4.0

Clemson, SC

Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Discrete Math, Calculus 1&2, Linear Algebra, Computer Organization, Software Engineering, Applied Data Science, Operating Systems, Network Programming.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript, TypeScript, SQL, HTML/CSS

Libraries & Frameworks: React, REST APIs, FastAPI, PostgreSQL, SQLAlchemy, PyTorch, Pandas, NumPy

Developer Tools: Git, GitLab, GitLab CI/CD, Docker, AWS (Lambda, SSM, Athena, SNS), Terraform, Postman, Firebase, Linux, VSCode, Vite, Jupyter Notebook

EXPERIENCE

Truist

Atlanta, GA

Software Engineer Intern

May 2026 – Present

- Developed a **Python** audit tool deployed on **AWS Lambda** and automated through **GitLab CI/CD** to validate support-group distribution lists across **114 AWS accounts** against Active Directory via **LDAP**, reducing a **5-hour** manual audit to **under 2 minutes** and identifying invalid or missing distribution lists in **26% of accounts**.
- Architected an automated notification system to generate account-specific remediation instructions, eliminating manual email drafting and ensuring consistent, actionable guidance for every flagged account.
- Automated AWS instance hardening by identifying tagged EC2 instances with **Athena** and provisioning **Terraform-managed** infrastructure to execute OS-specific hardening through **AWS Systems Manager (SSM)**.

Handshake

Remote

AI Software Engineer (Contract)

Feb 2026 – May 2026

- Analyzed complex open-source codebases to identify bugs and implement golden solutions, setting up **Docker**-based test environments with custom bash scripts to validate fixes in isolated CI/CD pipelines.
- Developed and evaluated **50+** domain-specific prompts to benchmark LLM performance across code generation tasks, identifying failure patterns and providing structured feedback to improve model reasoning accuracy.

Eleos Technologies

Clemson, SC

Software Engineer Intern

April 2025 – Sep 2025

- Developed and maintained **200+** automated test scripts using **Python** and **Postman**, reducing manual testing time by **60%** and accelerating software release cycles.
- Executed **900+** test cases across multiple feature releases, identifying and documenting **100+** critical bugs that reduced application crash frequency significantly.
- Collaborated with development team to reproduce and resolve defects, reducing average bug resolution time by **50%** through detailed reproduction steps and logs.

PROJECTS

Spotify Artist Dashboard | *Python, React, TypeScript, SQL, FastAPI, PostgreSQL, Git*

- Built a full-stack Spotify analytics dashboard using **React**, **TypeScript**, **FastAPI**, and **PostgreSQL**, serving **30+ users** and integrating the Spotify Web API to visualize artist profiles, top tracks, and audio features.
- Optimized application performance with **PostgreSQL** caching and **Vite**, reducing external API requests by **40%** while improving responsiveness.

NYT Strands Solver | *C/C++, Git*

- Engineered a **C++** word-search puzzle solver, utilizing graph traversal and back-tracking algorithms to identify valid word paths across custom grids.
- Achieved **98%** path accuracy across **30+** benchmark test cases while supporting configurable dictionaries and board sizes through a command-line interface.

LEADERSHIP

National Society of Black Engineers (NSBE) - Clemson University

Aug 2026 – Present

Secretary

- Coordinate logistics for General Body Meetings and Executive Board meetings by scheduling facilities, reserving equipment, and maintaining the chapter calendar.
- Record and distribute meeting minutes, maintain official chapter documentation, and manage chapter correspondence with executive leadership.

Senator

Aug 2025 – May 2026

- Represented the Clemson chapter at **3+** regional and national conferences, advocating for member interests and casting informed votes.
- Organized **4+** social and professional development events that connected **50+** members with industry professionals, fostering networking and skill-building opportunities.

ColorStack

May 2024 – Present

Fellow

- Engaged with a network of **15,000+** Black and Latinx CS students through community Slack channels, career fairs, and Fam Friday events, broadening my professional network across the tech industry.
